

# Worksheet

## Measuring and Comparing Objects

Name: \_\_\_\_\_

Date: \_\_\_\_\_

1. Measure the length of each object using paper clips. Write the number of paper clips next to each object.

a. Pencil: \_\_\_\_\_ paper clips

b. Book: \_\_\_\_\_ paper clips

c. Block: \_\_\_\_\_ paper clips

2. Compare the lengths of the objects. Order them from shortest to longest.

---

3. Measure the length of the same objects using unifix cubes.

Write the number of unifix cubes next to each object.

a. Pencil: \_\_\_\_\_ unifix cubes

b. Book: \_\_\_\_\_ unifix cubes

c. Block: \_\_\_\_\_ unifix cubes

4. Compare the lengths of the objects again. Order them from shortest to longest.

---

5. Why is it important to use the same unit of measurement when comparing objects?

---

---

---

This lesson plan and worksheet will help Year 1 students understand the importance of using the same unit of measurement to compare objects accurately, providing hands-on activities to reinforce their learning.
